Innovaré Limited is a multiple award-winning Management Consulting and Technology Services Group based in Accra, Ghana. Innovaré Limited takes pride in being accredited by the Cyber Security Authority as a Tier 1 in Governance, Risk, and Compliance (GRC), Training, and Vulnerability Assessment and Penetration Testing (VAPT). This recognition reflects our commitment to providing cutting-edge solutions and ensuring the highest standards in cybersecurity for our valued clients.

Our mission is to partner enterprises of all sizes within various industry sectors to create optimal business value through the adoption and use of top-notch tailored solutions and global best practices.

We operate across all sectors and industries, with local and international footprints in Government, Banks, Telcos, Insurance, FinTechs, Media. Some of our major clients are the biggest corporate organizations in their respective industries.

With a combined global experience of over 150 years, our in- house consultants are experts in the following areas:

- Transformation
- Digital Strategy
- Cybersecurity
- Systems Audit & Assurance
- Financial Solutions
- Data Analytics
- Human Capital Development
- Governance, Risk & Compliance (GRC).

Innovare is ISO27001 certified.

We are a leader with proud heritage in the provision of Cybersecurity and GRC services. We have helped organizations to improve resilience posture through comprehensive Systems Audits.

We have also trained and prepared thousands of working professionals towards various globally-recognized certifications in risk, security, audit, service management and governance.

ISMS Information Security Management System

In today's information economy, the protection of information assets – 'information security' – is rapidly overtaking physical asset protection as a fundamental corporate responsibility.

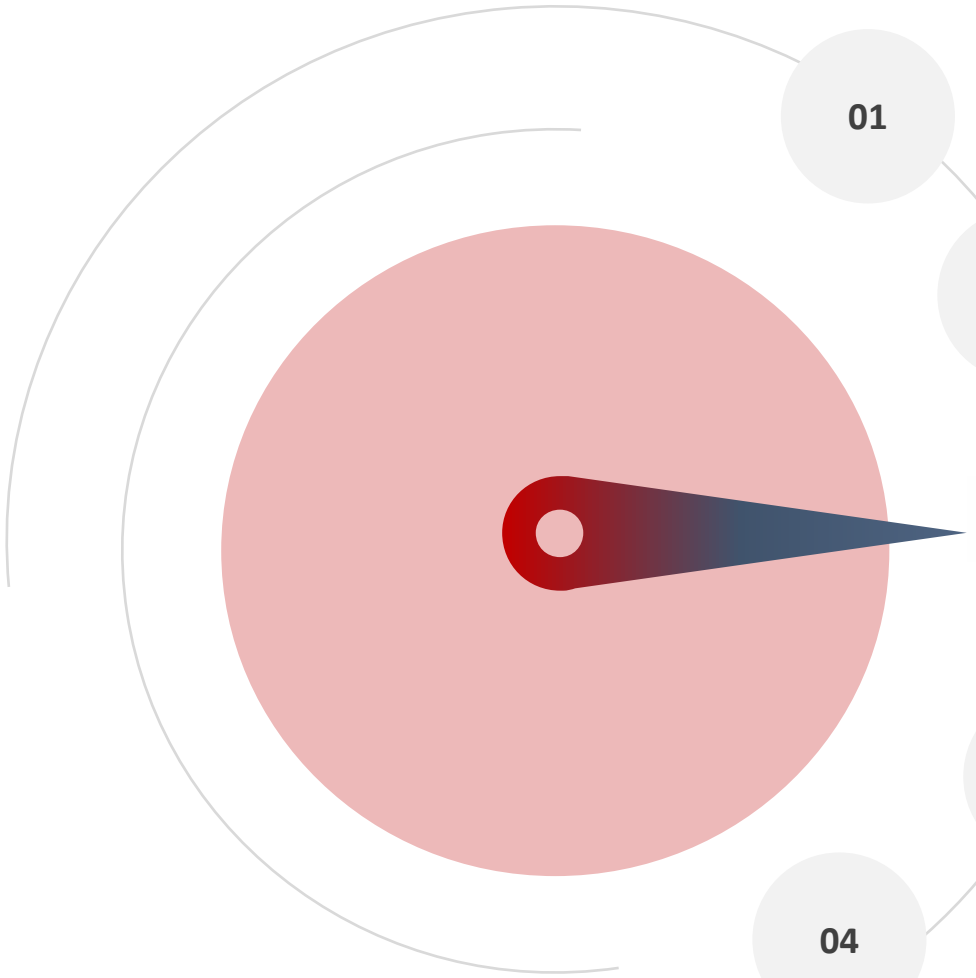

ISO 27001 is a specification that sets out the requirements for an Information Security Management System (ISMS). Being certified to ISO 27001 will help you to manage and protect your valuable information assets.

This standard is particularly suitable where the protection of information is critical, such as in the finance, health, public and IT sectors.

"ISO 27001 is suitable for any organization, large or small, in any sector or part of the world."

innovaré

Compliance Steps

01 ISMS Scope

02 Updated Inventory of Information Assets

03 Risk Assessment Report, Statement of Applicability (SOA), Risk Treatment Plan (RTP)

04 Information Security Policies, Standards and Procedures

05 Operational Handbook

innovaré

A. Project Deliverables: Planning & Initiation

01

Detailed Gap Analysis

- Towards identifying ISMS processes that exist and their maturity levels
- Towards gaining a better understanding of the environment

02

ISMS Scope

- Define regulatory and legislative environment
- Agree on a scope under which the ISMS will cover
- Possible considerations are, geographical, organizational, application environment or infrastructure environment

03

Develop/Update Inventory of Information Assets

- Ensure all information assets are captured (hardware, software, infrastructure, data, documents, personnel, processes, services, facilities)
- Improve and update the information assets inventory

04

Define Risk Assessment Methodology

- Identify and agree on assessment methodology

innovaré

B. Project Deliverables: Assessment and Preparation of Supporting Documentation

01

Perform Risk Assessment

- Undertake the identification of threats and vulnerabilities in the environment
- Determine likelihood and impact towards determining risks

02

Prepare Statement of Applicability

- Identify the applicable control objectives under ISO 27001

03

Prepare Risk Treatment Plan

- Develop strategies on how to mitigate the identified risks guided by the identified control objectives

04

Prepare ISMS Implementation Program

- Develop framework for the execution of the ISMS

innovaré

C. Project Deliverables: Develop ISMS

01

Develop Policies & Guidelines

- Work with the Information security steering committee to develop policies that are appropriate for the environment and the work culture
- Project team to identify appropriate standards that fulfil policy and environmental requirements
- Develop procedures and guidelines aligned to the standards

02

Develop Data Classification Framework

- Design framework appropriate for the environment
- Develop accompanying labelling and handling procedures

03

Interface with Business Units + Develop Security Awareness Program

- Organize workshops with business units
- Identify at-risk behaviors
- Develop awareness program strategies

04

Develop Internal ISMS Audit and Review Plan

- Develop KRIs and KPIs
- Develop monitoring systems
- Identify high risk areas for review

innovaré

D. Project Deliverables: Consolidation

01

Begin information security awareness program

- Roll out awareness program
- Perform specific audits of risk behaviours

02

Perform Compliance Review

- Undertake risk-based reviews of controls
- Issue nonconformity/preventive/ corrective action report

03

Perform preventive and corrective action if necessary

- Organize workshops with business units
- Address any nonconformities identified in the review

innovaré

Full Implementation vs Managed Services

Full Implementation

With this approach, the project we will handover as soon as certification is achieved. **This approach is ideal for larger organisations who already have the key functions needed to operate the ISMS on an ongoing basis.** Key functions include:

- Information Security Manager – will be managing the ISMS. (The training requirement is the ISO 27001 Lead Implementer course)
- Risk Manager – will be performing on going risk assessments. (The training requirement is ISO 27005 Lead Risk Manager)
- Internal Auditor – will be performing ongoing audits. (The training requirement is the ISO 27001 Lead Auditor)

This approach normally has three (3) payment milestones, with the last one coinciding with the certification audit.

Managed Services

With this approach, Innovaré will sign a 3-year contract to implement and operate the ISMS on an ongoing basis for the contract period. The training and handholding of identified individuals is pronounced and over a longer period to ensure that true capacity is built for future sustainability of the ISMS, with this approach. Key functions include:

- Information security management – for managing the ISMS
- Risk Management – for performing on going risk assessments
- Internal Audit – for performing ongoing audits

With Managed Service, the payment is a small monthly fee for the duration of the contract period.

innovaré

Service Inclusions

Full Implementation – Service Inclusions

•Implementation of ISO 27001:2022 Information Security Management System.

•Give specific guidance and general work procedures for realizing the institution's cyber and information security posture.

•Conduct end of project Internal Audit.

•Provide audit support during the Certification Audit for the Implementation

•Recommend and liaise with External Certifying Body to conduct certification audit for the Certification.

Managed Services – Service Inclusions

• Assist BlockFinaX in provision of all regulatory advisory requirements needed for the Virtual Assets Sandbox

•Implementation of ISO 27001:2022 Information Security Management System.

• Handholding during and after certification.

• Advise Senior Management and Board on Cyber and Information Security Management issues.

• Give specific guidance and general work procedures for realizing the institution's cyber and information security policy.

• Support to manage the organization's Cyber and Information Security policies.

• Establish and submit quarterly reports to the Senior Management and Board, explaining the institutional cyber and information security defense level, available countermeasures and the activities required to enhance its defenses.

• Deliver an hour of awareness training and support the general awareness program of BlockFinaX

• Provide information security training as part of the orientation of new staff.
